

**Bring your unique perspective
and help us change the lives of
millions.**

Optum, part of the UnitedHealth Group family of businesses, is taking global healthcare operations to a new level with offices in **33 countries**. In India alone, we have offices in **Bangalore, Chennai, Gurugram, Hyderabad, Mumbai and Noida**. We're focused on finding the kind of solutions that make a huge difference in the lives of people around the world with sweeping changes in health services and business innovation.

Optum India: Advanced Capabilities Overview

Established in India in 2006, Optum provides distinct global operations and technology capabilities that span the entire health care value chain and are complemented by advanced analytics and automation. With **25,000+ professionals** covering **10 global capabilities and delivery centers**, there's a reason we are one of the fastest growing health care technology and product innovation companies.

Our team provides a comprehensive suite of consulting, technology and process solutions that streamline health care delivery. We work to ensure high quality execution, offer a competitive value proposition and drive growth by continuously expanding our services in the following areas:

Business Process Solutions. Our operations team works with clients as their strategic partner, helping them navigate business challenges through transformative solutions from clinical services to billing and enrollment.

Re-Engineering and Automation. Our team is focused on bringing fundamental changes to the health system by redesigning processes with new technology like robotics automation, AI, IOT and analytics.

Technology. The team enhances the health care experience for customers by adopting new age technologies such as cloud, Blockchain and mHealth to deliver more efficient service at a lower cost.

Business Excellence. We deliver measurable, sustainable performance improvement by leveraging Lean and Six Sigma project management methods in alignment with our overall business goals of reducing Non-Value Adds while improving affordability, quality, and customer satisfaction.

Advanced Research and Analytics. We apply artificial intelligence to help care providers and benefit sponsors predict what will happen in the future so they can make better decisions today.

Diversity creates a healthier atmosphere: Optum is an Equal Employment Opportunity/Affirmative Action employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, age, national origin, protected veteran status, disability status, sexual orientation, gender identity or expression, marital status, genetic information, or any other characteristic protected by law. Optum is a drug-free workplace. Candidates are required to pass a drug test before beginning employment. ©2021 Optum. All rights reserved.
